

Health Services

Global Perspectives Travel Immunization Requirements

The mandatory vaccinations are necessary for international travel. The highly recommended vaccinations are identified by a comprehensive travel medicine database specifically related to international health and travel as moderate risks to travelers. These may include but are not limited to country, region, elevation, province, and city.

South Africa

May 6-21, 2023

Mandatory:

- MMR (Measles, Mumps, Rubella) vaccines x 2 or positive titers
- Varicella (chickenpox) vaccines x 2 or positive titer

Highly Recommended:

- Tdap (Tetanus, Diphtheria, & Pertussis) vaccine, needs updating every 10 years
- Hepatitis A vaccines (series of 2)
- Typhoid vaccine
- Malaria Prophylaxis

****Mosquito protection/avoidance recommended due to risk of Chikungunya Fever****

****Travelers' Diarrhea is considered moderate risk****

****Per Lee University Travel Policy: University sponsored domestic and international travel will proceed consistent with CDC guidelines and with recommended guidance from the U.S. State Department Travel Advisories. A testing protocol may be required before and/or during group travel, depending on the group and the destination. Similarly, COVID vaccination requirements for international travel are determined by the country of destination. The trip directors will alert their participants to any updates****
